

8s Song

(to the tune of *The Gypsy Rover*)

The number eight wandered over the hill
Singing a song and sighing.
Let's hear the fate
Of the number eight
As we go multiplying.

One multiplied by 8 is eight
Two 8s equal 16
Three 8s are 24
And four are 32
And five 8s equal 40.

Six 8s are 48
Seven 8s are 56
Eight 8s are 64
And nine are 72
And ten 8s equal 80.

The number eight wandered over the hill
Singing a song and sighing.
We've heard the fate
Of the number eight
As we went multiplying.
