

This package of curriculum resources provides learning opportunities for students to continue their educational development and progress while not being able to access a school.

It is anticipated that the resources could be used in a variety of contexts, including teacher-directed, parent-supported or students working independently. However, students in Prep to Year 3 will require adult support to read and understand instructions and possibly scribe responses and answers to questions.

As students work through these resources, it is important that regular contact be maintained between classroom teachers and parents/students.

No assessment lessons or tasks are included in this package.

Structure

The Maths materials contained in this package include:

- lessons including links to resources

Lessons

There are six lessons contained in this package. Students will need to complete them in the following order:

- Lesson 1 — [Exploring size 1](#)
- Lesson 2 — [Exploring size 2](#)
- Lesson 3 — [Exploring size 3](#)
- Lesson 4 — [Exploring size 4](#)
- Lesson 5 — [Describing the mass of objects](#)
- Lesson 6 — [Making direct comparisons of mass](#)

Resources

Required resources are listed in the materials.

Students:

- will need access to everyday stationery supplies, such as pencils, pens, an eraser, colouring pencils, scissors, glue
- may print the worksheets if they have access to a printer, or write responses in an exercise book or on paper
- may need access to an internet search engine to locate particular educational resources or websites.

Notes

In this package, students are required to access a familiar text such as *Who sank the Boat?* or *Goldilocks and the three bears*.

If you don't have a copy of the books at home, try some of the following ideas:

- search online for a video of someone reading the book.

Online safety warnings

Assess websites for suitability prior to displaying to your child.
