Water investigation

1. Pose a science question about the effects of water on materials. 🗣
2. Test and sort the materials you have water-tested into groups (good for wind ornament or not good). Tape a piece of each material into the matching column below.

✓ Good for a wind ornament	✘ Not good for a wind ornament

1. Explain what happened to some of the materials when water was added. 🗣

2. What are some properties of materials suitable for a wind ornament?
