

Field study record: Healthy habitats

What are we investigating?

We are investigating healthy habitats that we can observe in our local area.

Where are we investigating?

This is a photo/drawing of the area we chose.

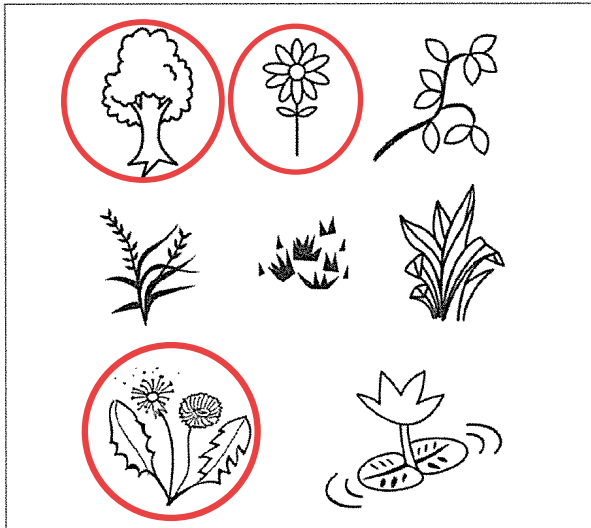

What will we need? (Circle what is needed for a field study.) For example:

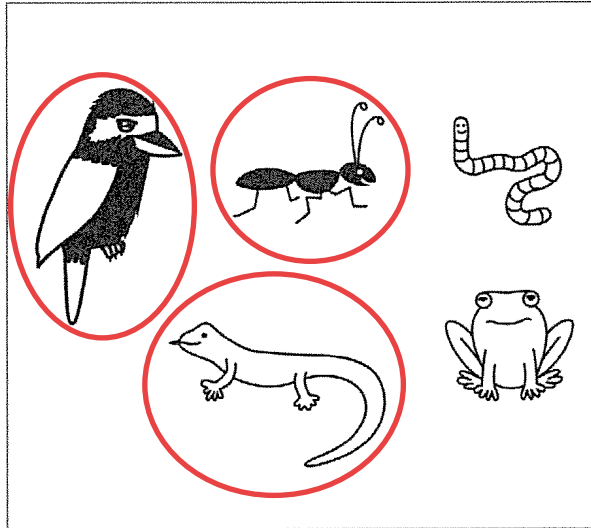

What different types of living things can we see? (Circle or draw in your Science journal.)
For example:

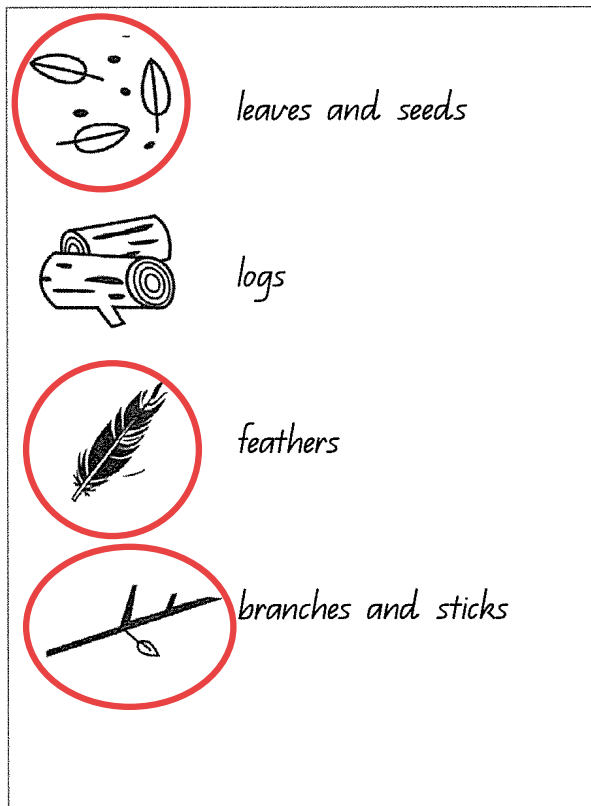

Plants

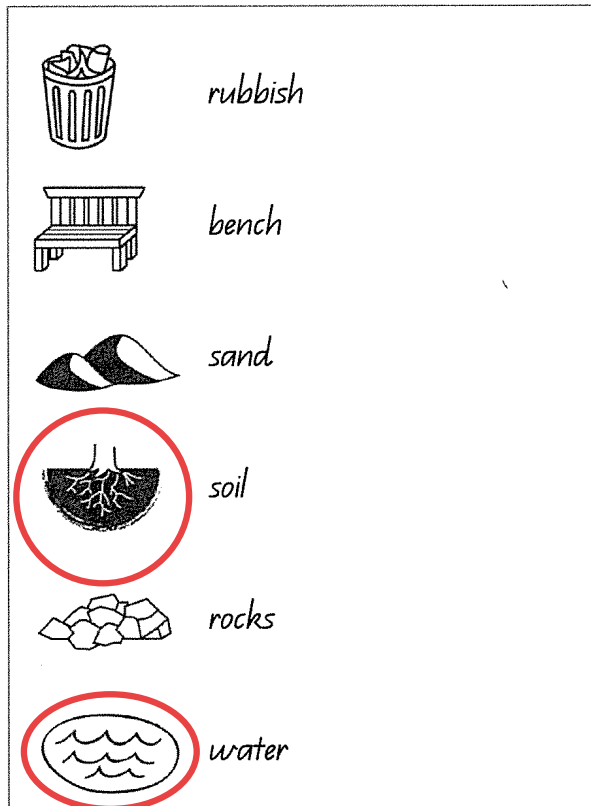

Animals

Plant and animal parts

Other

Our conclusion

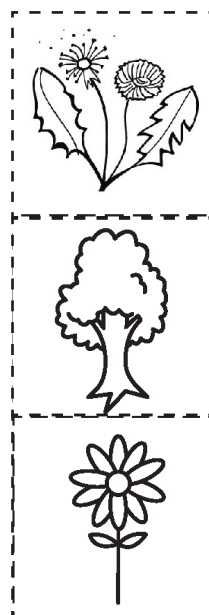

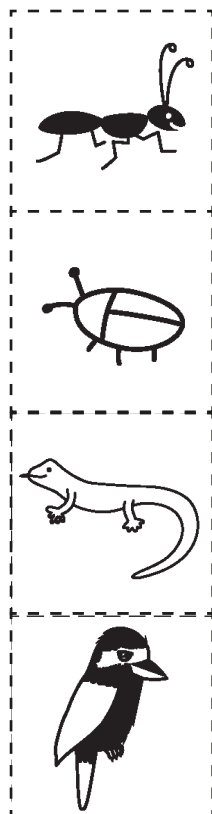

I think this is a healthy habitat because ...

Student response should include how the habitat can meet the needs of living things.

Symbols and graphing

For example:

Living things
